Versions and types

Fixed circuit-breaker

Plug-in circuit-breaker

Tmax XT automatic circuit-breakers are available in the following versions:

- **FIXED.** Fixed circuit-breakers consist of a current-interrupting part connected to the trip unit, to be installed on the back plate of the cubicle or on a DIN rail;
- **PLUG-IN.** Plug-in circuit-breakers consist of a fixed part that must be installed on the back plate of the cubicle, and of a moving part, obtained from the fixed circuit-breaker plus the relative kit that converts it from the fixed version into the moving part of the plug-in version;
- **WITHDRAWABLE.** Withdrawable circuit-breakers consist of a fixed part that must be installed on the back plate of the cubicle equipped with side runners to allow the moving part to be easily racked out and in, which is obtained from the fixed circuit-breaker plus the relative kit that converts it from the fixed version into the withdrawable moving part. To obtain the withdrawable version, a front accessory to be applied onto the front of the circuit-breaker must be ordered so as to maintain the IP40 degree of protection over the entire isolation run of the circuit-breaker.

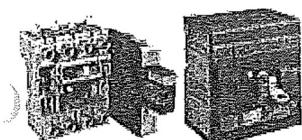

If the plug-in circuit-breaker is fitted with electrical accessories, the appropriate connectors for isolation of the relative auxiliary circuits must also be ordered on the other hand, for the withdrawable version there are dedicated accessories, fitted with connectors which allow automatic disconnection in the case of racking-out (consult the "connection of electrical accessories" section in the Accessories chapter).

Starting from the fixed version, SACE Tmax XT circuit-breakers can easily be converted into the plug-in and withdrawable versions using the relative conversion kits.

The moving part can always be obtained in the required version, fully pre-engineered in the factory, by ordering the fixed circuit-breaker and the conversion kit at the same time.

	Version		
	Fixed	Plug-in	Withdrawable

XT4	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

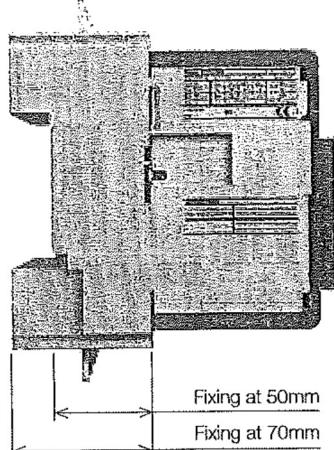

Fixed part of plug-in and withdrawable versions

Withdrawable circuit-breaker

The fixed parts of the plug-in/withdrawable versions are available with front terminals (F) or with horizontal or vertical rear terminals (HR/VR). The terminals are factory-mounted in the horizontal position. In case of need, the Customer can easily rotate the terminals into the vertical position. These fixed parts can be equipped with the same terminal, terminal-cover and phase separator kits used for the fixed circuit-breakers, using the proper adapter.

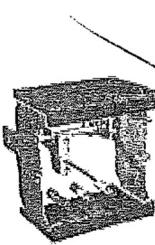

The fixed parts of a plug-in/withdrawable circuit-breaker can be installed at a distance of 50mm from the back of the panel or at 70mm as shown in the picture. Installation at 50mm is only compulsory in the case where rear vertical or horizontal terminals (HR/VR) are used.

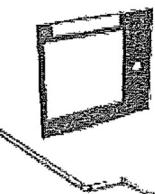

Conversion kits

Conversion kit for turning a fixed circuit-breaker into the moving part of a plug-in circuit-breaker

Conversion kit for turning a fixed circuit-breaker into the moving part of a withdrawable circuit-breaker

Conversion kit for turning a fixed part of plug-in version into the fixed part of a withdrawable version

The following conversion kits can be obtained in order to create the different versions:

- Kit for converting the fixed circuit-breaker into the moving part of plug-in/withdrawable versions. The conversion kit converts the fixed circuit-breaker into the moving part of plug-in/withdrawable versions. Only when withdrawable versions are made is it essential to order an accessory to apply to the front of the circuit-breaker so as to maintain the IP40 degree of protection over the entire isolation run. This accessory can be chosen from:
 - front for lever operating mechanism (FLD);
 - motor operator (MOE);
 - direct or transmitted rotary handle operating mechanisms (RHD or RHE).In the case where no accessory to be applied onto the front is indicated, the front for lever operating mechanism (FLD) is automatically included in the order.
- Kit for converting the fixed part of plug-in versions into the fixed part of withdrawable versions. The kit comprises:
 - a guide for turning the fixed part of the plug-in circuit-breaker into the fixed part of the withdrawable circuit-breaker;
 - a racking-out rotary handle that allows the moving part to be inserted and withdrawn. The mechanism allows the circuit-breaker to be set to the isolated position (with the power and auxiliary circuits disconnected) with the compartment door closed, all to the advantage of operator safety. The rotary handle can only be inserted when the circuit-breaker is open. Once it has been removed or withdrawn, the circuit-breaker can be set to the open/closed position;
 - a flange for the compartment door, which replaces the one supplied with the fixed version of the circuit-breaker.
- Kit for converting fixed type into the plug-in version for RC Sel residual current devices for XT2-XT4. RC Sel four-pole residual current devices for XT2 e XT4 can be converted from the fixed version into the plug-in version using the special kit.
- Kit for converting plug-in types into the withdrawable version for RC Sel residual current devices for XT2-XT4. RC Sel four-pole residual current devices for XT2 and XT4 can be converted from the plug-in version to the withdrawable version using the special kit, which comprises a bellows to apply to the front of the residual current device so as to allow it and the residual current part to be withdrawn when the panel door is closed. This kit can also be assembled on fixed circuit-breakers fitted with the front part for locks or the direct rotary handle, thus adding to the range of uses for residual current devices.

In the plug-in to withdrawable conversion kit, there is also a 6 pin connector to be applied onto the right side of the circuit-breaker to facilitate disconnection of the auxiliary circuits connected to the residual current device.

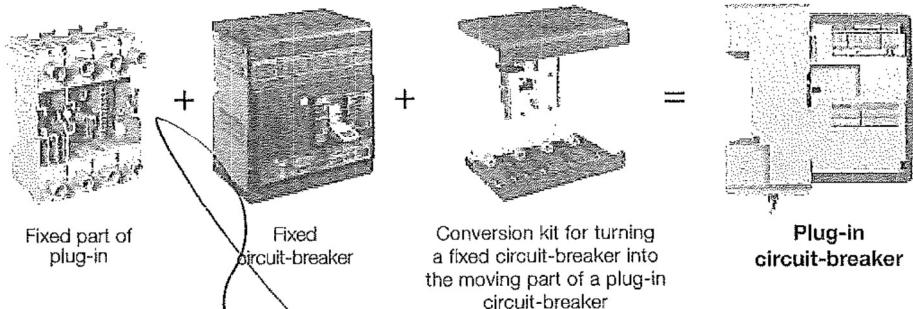

This kit contains also the shunt opening release of the residual current device dedicated to the withdrawable version, which is fitted with a connector for the fixed part and the moving part.

Connection terminals

Connection terminals allow the circuit-breaker to be connected to the system in the way most suited to the installation requirements. By and large they consist of:

- front terminals: for connecting cables or busbars directly from the front of the circuit-breaker;
- rear terminals: for installing circuit-breakers in segregated panels with rear access.

Where possible, the terminals have laser marking on the surface indicating the tightening torques for the correct isolation of cables and bars.

Fixed version

The part of the standard equipment, fixed version SACE Tmax XT circuit-breakers are supplied with front terminals (F). However, they can be fitted with the following types of terminals as accessories thanks to the special kits:

- extended front (EF);
- extended spread front (ES);
- front for copper/aluminium cables (FCCuAl). A pitch adapter must be applied to the terminal zone of the circuit-breaker to ensure that copper and aluminium cables with sections of up to 240mm² can be connected to all the circuit-breakers. The pitch adapter is automatically supplied when it is necessary (see table page 3/9);
- front for copper cables (FCCu);
- for flexible busbars (FB);
- multicable (MC);
- rear oriented (R).

For XT 1 and XT3 sizes, the use of not insulated busbar with Ue <= 480V involves the mandatory assembly of terminal covers HTC.

Accessories

Mechanical Accessories

Plug-in and withdrawable versions

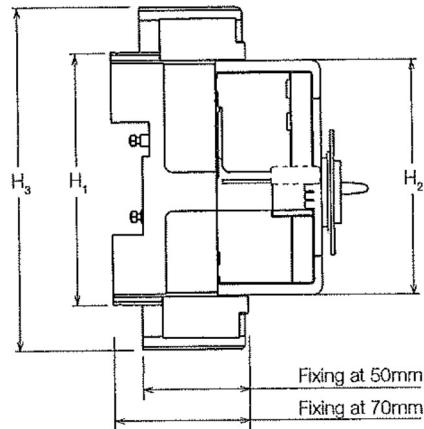

Fixed part of plug-in and withdrawable version circuit-breakers are normally supplied with extended front terminals (EF) or horizontal/vertical rear terminals (HR/VR).

The terminals are factory-mounted in the horizontal position. In case of need, the Customer can easily rotate the terminals into the vertical position.

A fixed part with front terminals (EF) can be converted into a fixed part with rear terminals (HR/VR) by ordering the appropriate terminal kit. The fixed parts can also be fitted with the same types of terminals available on the fixed circuit-breaker after an adapter has been installed on the terminal zone of the fixed part itself. Consequently, the following types of connection terminals are also available for the fixed part:

- extended spread front (ES);
- for copper-aluminium cables (FCCuAl);
- for copper cables (FCCu);
- for flexible busbars (FB);
- multi-cable (MC).

The adapter reproduces the terminal zone of the fixed circuit-breaker. This means that fixed parts can also be equipped with the same terminal covers and phase separators as those used for fixed circuit-breakers.

Terminal covers

Sealable screws

Terminal covers, phase separators and sealable screws for terminal covers

Terminal covers are applied to the circuit-breaker to prevent accidental contact with live parts, thus providing protection against direct contacts. The terminal covers are pre-punched for knock-out on the front to facilitate installation of busbars and/or cables, guaranteeing correct insulation.

The phase separator partitions increase the insulation characteristics between the phases on a level with the connections. They are mounted from the front, even when the circuit-breaker has already been installed, by inserting them into the corresponding slots.

The table lists the various different terminal covers and phase separators available for each SAGE Tmax XT circuit-breaker. The terminal covers/phase separators able to guarantee adequate circuit-breaker installation and correct insulation are listed in the "Connection Terminals" section of the Accessories Chapter alongside each terminal.

The lead sealing kit consists of screws which, when applied to the terminal covers, prevent their removal, providing protection against direct contacts and tampering. The screws can be locked with wire and lead seals.

Each sealing kit consists of two screws. The maximum number of sealable screws that can be used for each circuit-breaker is given in the table below.

Rotary handle operating mechanism

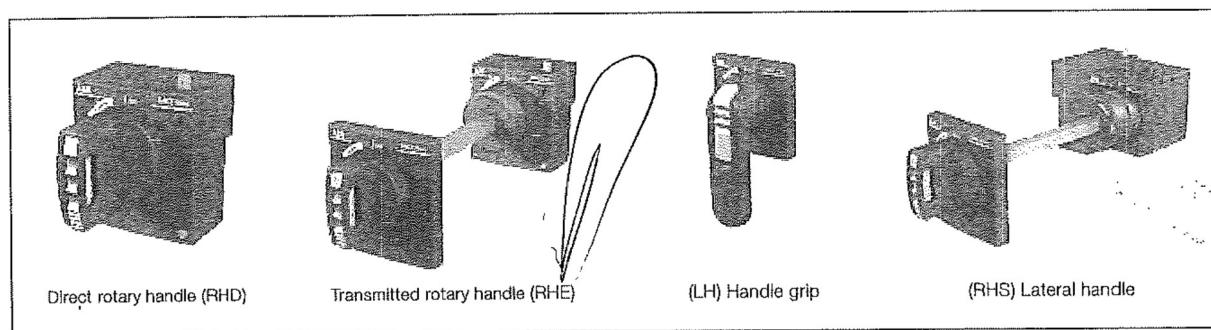

Operating device that allows the circuit-breaker to be operated by means of a rotary handle, which makes the circuit-breaker easier to open and close thanks to its ergonomic handgrip.

Different types of handles are available:

- direct (RHD): installed directly on the front of the circuit-breaker. Allows it to be operated frontally;
- transmitted (RHE): installed on the panel door. Allows the circuit-breaker to be operated by means of a rod which acts on a base installed on the front of the circuit-breaker;
- lateral left (RHS-L) and lateral right (RHS-R): installed directly on the front of the circuit-breaker. Allows it to be operated from the side.

The wide handle grip (LH) only is also available, which can be combined with the transmitted handle (RHE) and with the lateral handle (RHS).

All rotary handle operating mechanisms allow the opening of the switchboard door only with the circuit-breaker in open position.

Direct rotary handle (RHD)

Transmitted rotary handle (RHE)

(LH) Handle grip

(RHS) Lateral handle

All rotary handles are available in two versions:

- standard: grey colour;
- emergency: red on a yellow background. Suitable for operating machine tools.

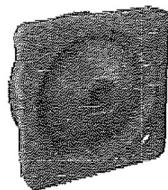

Rotary handles can be ordered:

- by specifying one single sales code (for RHD, RHE, RHS L/R);
- by indicating the following three devices (only for RHE):
 - rotary handle on compartment door with normal standard handgrip (RHE_H, RHE_H LH) or emergency handgrip (RHE_H_EM, RHE_H_EM LH);
 - 500mm transmission rod (RHE_S). The minimum and maximum distances between the fixing plate and the door are 60.5mm and 470.5mm;
 - base on the circuit-breaker to fix to the circuit-breaker (RHE_B).

Use of the rotary handle is an alternative to the motor operator and to all accessories of the front type.

The rotary handles can be locked by means of a vast range of key locks and padlocks (consult the "locks" section of the Accessories chapter).

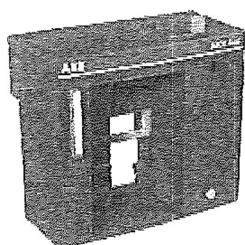

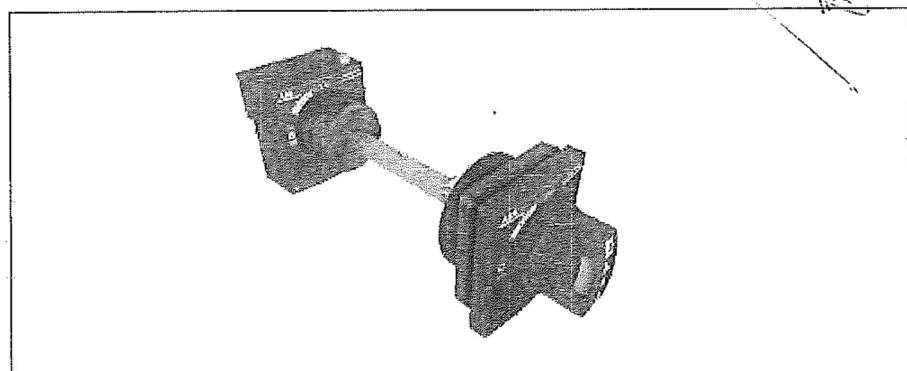

The direct and transmitted rotary operating mechanisms allow early contacts to be used on closing so as to supply the undervoltage release in advance of circuit-breaker closing (consult the "early auxiliary contacts" section of the Accessories chapter).

IP54 protection

IP54 Protection

Device which can be applied onto the transmitted rotary and lateral handle allowing IP54-degree of protection^(G.1.1) to be achieved.

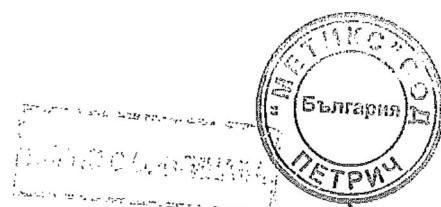

Front for locks

Front for operating lever mechanism

This device can be installed on the front of the circuit-breaker and allows it to be locked with key locks and padlocks.

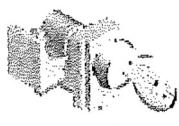

The front for lever operating mechanism can only be installed on XT2 and XT4 three-pole and four-pole circuit-breakers. The front for lever operating mechanism can be fitted with a vast range of key locks and padlocks (see the "locks" section of the Accessories chapter).

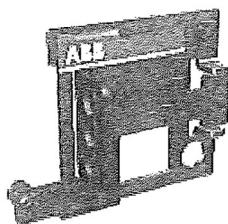

Accessories

Mechanical Accessories

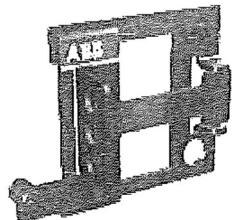

Locks

Key lock

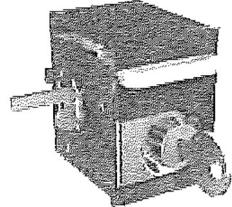

Fixed padlock in open position

Fixed padlock in open/closed position

Removable padlock in open position

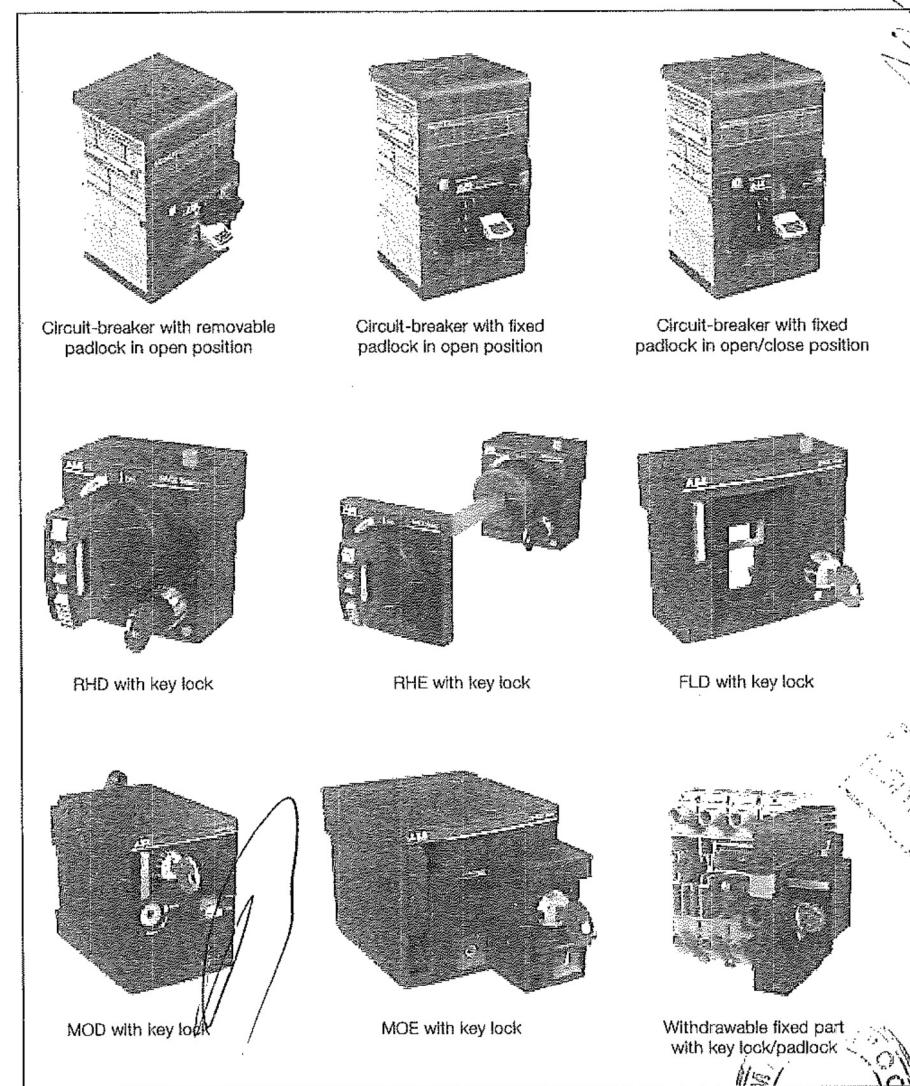

Key lock/padlock for withdrawable fixed part

Padlocks or key locks that prevent the circuit-breaker from being closed and/or opened. They can be fitted:

- directly on the front of the circuit-breaker;
- on the rotary handle operating mechanism;
- on the front for lever operating mechanism;
- on the motor;
- to the fixed and withdrawable part, to prevent the moving part from being inserted;
- on the front of the thermomagnetic trip unit, to prevent the adjuster of the thermal part from being tampered with.

All locks that hold the circuit-breaker in the open position ensure circuit isolation in accordance with the IEC 60947-2 Standard. In the closed position, the locks do not prevent the mechanism from releasing after a fault or remote control.

ПРИЛОЖЕНИЕ 9.2.2

Техническо описание и чертежи с нанесени на тях размери

Триполюсните автоматични прекъсвачи НН с лят корпус представляват механични комутационни апарати от фиксиран тип с предно свързване на шинната система. Автоматичните прекъсвачи са способни да провеждат и да включват/изключват ръчно електрически токове във вериги при нормални условия и да включват/да провеждат за определено време и да изключват автоматично посредством защита от електронен тип токове във вериги при условията на претоварване и късо съединение.

Тялото (корпусът) на автоматичните прекъсвачи НН е изработено чрез формоване на устойчив на нагряване, на огън и на механични удари изолационен материал.

Управлението се осъществява ръчно посредством лост.

Включването/изключването на контактите на трите полюса се осъществява едновременно с висока скорост, която не зависи от действието на оператора. Автоматичния прекъсвач изпълнява разединяваща функция, която е обозначена с предвидения от стардарта символ. На челния панел на прекъсвача е разположен тест-бутон за проверка на изключвателния механизъм. Лостът за управление при вертикално монтиране на автоматичните прекъсвачи се движи в направление „нагоре-надолу“, при което контактите се затварят при движение нагоре. Лостът има три ясно индикирани положения, съответстващи на позицията на контактната система: „Включено“, „Изключено“ и „Автоматично изключено от свръх токове/Тест“.

Конструкцията осигурява защита срещу проникване на твърди тела и вода до степен най-малко IP 20 за клемните съединения и IP 40 за челната повърхност на прекъсвача.

DATE
31 Mar 2016

ABS TECHNICAL OFFICE
Genoa Engineering Department

CERTIFICATE OF DESIGN ASSESSMENT

This is to certify that a representative of this Bureau did, at the request of

ABB S.P.A. - ABB SACE DIVISION

assess design plans and data for the below listed product. This assessment is a representation by the Bureau as to the degree of compliance the design exhibits with applicable sections of the Rules. This assessment does not waive unit certification or classification procedures required by ABS Rules for products to be installed in ABS classed vessels or facilities. This certificate, by itself, does not reflect that the product is Type Approved. The scope and limitations of this assessment are detailed on the pages attached to this certificate.

Product: **Circuit Breaker**

Model: **Tmax T1, T2, T3, T4, T5, T6 and T7**

This Product Design Assessment (PDA) Certificate 16-GE1500148-PDA, dated 31/Mar/2016 remains valid until 30/Mar/2021 or until the Rules or specifications used in the assessment are revised (whichever occurs first).

This PDA is intended for a product to be installed on an ABS classed vessel, MODU or facility which is in existence or under contract for construction on the date of the ABS Rules or specifications used to evaluate the Product.

Use of the Product on an ABS classed vessel, MODU or facility which is contracted after the validity date of the ABS Rules and specifications used to evaluate the Product, will require re-evaluation of the PDA.

Use of the Product for non ABS classed vessels, MODUs or facilities is to be to an agreement between the manufacturer and intended client.

На основание чл.36а ал.3 от ЗОП

NOTE: This certificate evidences compliance with one or more of the Rules, Guides, standards or other criteria of ABS or a statutory, industrial or manufacturer's standards. It is issued solely for the use of ABS, its committees, its clients or other authorized entities. Any significant changes to the aforementioned product without approval from ABS will result in this certificate becoming null and void. This certificate is governed by the terms and conditions as contained in ABS Rules 1-150/5.9 Terms and Conditions of the Request for Product Type Approval and Agreement (2010).

TERMS & CONDITIONS OF ABS DESIGN ASSESSMENT

1. AGREEMENT

Unless otherwise agreed in writing, all services rendered and certificates issued are governed by the terms and conditions of the "Request for Product Type Approval and Agreement" (the "Agreement") which are hereby incorporated by reference.

2. REPRESENTATIONS AS TO DESIGN ASSESSMENT

A certificate of design assessment represents that the product design meets the ABS, statutory, industrial or manufacturer's standard described on the reverse hereof and that the manufacturer has established a systematic quality monitoring system sufficient to show its capacity to consistently manufacture a product which meets the designated standards. ABS is not a substitute for the independent judgment of professional designers or engineers nor a substitute for the quality control procedures of contractors, steel makers, suppliers, manufacturers and vendors of marine structures, materials, machinery or equipment. ABS represents solely to the manufacturer or other client of ABS that it will use due diligence in developing Rules, Guides and standards and in surveying the plant as called for by ABS criteria for type approval.

3. SUSPENSION OF CERTIFICATION

Any of the following events will cause immediate suspension of the certificate of design assessment unless the change is submitted to ABS for a new review and audit.

- a) Redesign of the product or products covered by this certificate;
- b) Change in production methods;
- c) Substantial change in management organization;
- d) Substantial change in frequency or curriculum for personnel training;
- e) Refusing access to ABS personnel for periodic or annual audits;
- f) Failure to correct a non-compliance identified during an audit or in service;
- g) Failure to pay ABS fees.

4. VALIDITY

The validity, applicability and interpretation of a certificate issued under the terms of or in contemplation of ABS Type Approval are governed by the Rules, Guides and standards of American Bureau of Shipping which shall remain the sole judge thereof. Nothing contained in this certificate or in

any report issued in contemplation of this certificate shall be deemed to relieve any designer, builder, owner, manufacturer, seller, supplier, repairer, operator or other entity of any warranty express or implied, nor create any interest, right, claim or benefit in any third party. It is understood and agreed that nothing expressed herein is intended or shall be construed to give any person, firm or corporation other than the parties hereto, any right, remedy, or claim hereunder or under any of the provisions herein contained; all of the provisions hereof are for the sole and exclusive benefit of the parties hereto.

5. LIMITATION

ABS makes no representations beyond those contained herein and in the provisions of the Agreement regarding its reports, statements, plan review, surveys, certificates or other services.

6. HOLD HARMLESS

The party to whom this certificate is issued, and his assignee and successor in interest, agree to indemnify and hold harmless ABS from and against any and all claims, demands, lawsuits, or actions for damages, including legal fees, to persons or other legal entities and property, tangible, intangible, or otherwise which may be brought against ABS incidental to, arising out of or in connection with the work done, services performed or material to be furnished under this certificate, except for those claims caused solely and completely by the negligence of ABS, its agents, employees, officers, directors or subcontractors.

7. ARBITRATION

Any and all differences and disputes of whatsoever nature arising out of this agreement shall be put to arbitration in the City of New York pursuant to the laws relating to the arbitration there in force, before a board of three persons, consisting of one arbitrator to be appointed by ABS, one by Client, and one by the two so chosen. The decision of any two of the three on any point or points shall be final. Until such time as the arbitrators finally close the hearings either party shall have the right by written notice served on the arbitrators and on an officer of the other party to specify further disputes or difference under this Agreement for hearing and determination. The arbitration is to be conducted in accordance with the rules of the Society of Maritime Arbitrators, Inc. The arbitrators may grant any relief, other than punitive damages,

which they, or a majority of them, deem just and equitable and within the scope of the agreement of the parties, including, but not limited to, specific performance. Awards made in pursuance to this clause may include costs including a reasonable allowance for attorney's fees and judgment may be entered upon any award made hereunder in any court having jurisdiction. ABS and client hereby mutually waive any and all claims to punitive damages in any forum.

Client shall be required to notify ABS within thirty (30) days of the commencement of any arbitration between it and third parties which may concern ABS's work in connection with this Agreement and shall afford ABS an opportunity, at ABS's sole option, to participate in the arbitration.

8. TIME BAR TO LEGAL ACTION

Any statutes of limitation notwithstanding, Client expressly agrees for itself and its affiliated companies that its right to bring or to assert against ABS any and all claims, demands or proceedings whether in arbitration or otherwise shall be waived unless (a) notice is received by ABS within thirty (30) days after Client or its affiliates had notice of or should reasonably have been expected to have had notice of the basis for such claims; and (b) arbitration or legal proceedings, if any, based on such claims or demands of whatever nature are commenced within one (1) year of the date of such notice to ABS.

9. LIMITATION OF LIABILITY

The combined liability of American Bureau of Shipping, its officers, employees, agents or subcontractors for any loss, claim, or damage arising from negligent performance or non-performance of any services under this Agreement, or from breach of any implied or express warranty of workmanlike performance in connection with the services, or from any other reason, to any person, corporation, partnership, business entity, sovereign, country or nation, shall be limited to the greater of a) \$100,000 or b) an amount equal to ten times the sum actually paid for the services alleged to be deficient.

The limitation of liability may be increased up to an amount twenty-five times that sum paid for services upon receipt of Client's written request at or before the time of performance of service and upon payment by Client of an additional fee of \$10.00 for every \$1,000.00 increase in the limitation.

Product: Circuit Breaker

Model: Tmax T1, T2, T3, T4, T5, T6 and T7

Intended Service:

Electrical Installation Protection for Marine and Offshore Equipment

Description:

Low voltage circuit breakers of moulded case construction, with microprocessor-based overcurrent release and thermal magnetic release.

Rating:

Rated Voltage: 240-690VAC / 125-500-750VDC

Rated Current: 160-250-320-400-630-800-1000-1250-1600A

See attachment for further details.

Service Restriction:

Unit Certification is not required for this product.

If the manufacturer or purchaser requests an ABS Certificate for compliance with a specification or standard, the specification or standard, including inspection standards and tolerances, must be clearly defined.

Comments:

The Manufacturer has provided a declaration about the control of, or the lack of Asbestos in this product.

търг с предмет:*

"Доставка и монтаж на комплектни метални трансформаторни постове"

РЕФ. № PPD 19-102

организиран от "ЧЕЗ Разпределение България" АД

Наименование на материала: Вертикален предпазител-разединител НН 400 А, с триполюсно управление

Съкратено наименование на материала: ВПР НН, 400 А, 3-полюсно управление

Област: Н – Трансформаторни постове

Категория: 16 - Предпазители, основи за предпазители и предпазител-разединители

Мерна единица: Брой

Аварийни запаси: Да

Характеристика на материала:

Триполюсен предпазител-разединител с вертикална конструкция, с обявен работен ток 400 А, с общо управление на полюсите, за директен монтаж върху събирателни шини с междуосово разстояние 185 mm, за високомощни предпазители със стопяма вложка НН, система А (NH система), с характеристика gG, размер 2, съответстващи на БДС EN 60269-1 и БДС HD 60269-2 или еквивалентно/и.

Използване:

Вертикалният предпазител-разединител е предназначен за включване, изключване, разединяване и защита на кабелни линии НН.

Съответствие на предлаганото изпълнение с нормативно-техническите документи:

Триполюсният вертикален предпазител-разединител за 400 А, с общо управление на полюсите трябва да отговаря на приложимите български и международни стандарти или еквиваленти и на техните валидни изменения и поправки:

- БДС EN 60947-1:2007 „Комутиационни апарати за ниско напрежение. Част 1: Общи правила (IEC 60947-1:2007)“ или еквивалентно/и;
- БДС EN 60947-3:2009 „Комутиационни апарати за ниско напрежение. Част 3: Товарови прекъсвачи, разединители, товарови прекъсвач-разединители и апарати комбинирани със стопяма предпазители (IEC 60947-3:2008)“ или еквивалентно/и;
- БДС EN 60269-1:2007 „Стопями предпазители за ниско напрежение. Част 1: Общи изисквания (IEC 60269-1:2006)“ или еквивалентно/и;
- БДС HD 60269-2:2013 „Стопями предпазители за ниско напрежение. Част 2: Допълнителни изисквания за стопями предпазители, предназначени за използване от квалифицирани лица (стопями предпазители предимно за промишлено приложение). Примери за стандартизиирани системи за стопями предпазители от А до К (IEC 60269-2:2013, с промени)“ или еквивалентно/и;
- БДС EN 60664-1:2007 „Координация на изолацията за съоръжения в електроразпределителни мрежи за ниско напрежение. Част 1: Правила, изисквания и изпитвания (IEC 60664-1:2007)“ или еквивалентно/и;
- БДС EN 60529+A1:2004 „Степени на защита, осигурени от обвивката (IP код) (IEC 60529:1989 + A1:1999)“ или еквивалентно/и

и да бъде оценен положително по реда и при условията на Наредбата за съществените изисквания и оценяване на съответствието на електрически съоръжения, предназначени за използване в определени граници на напрежението, приета с ПМС № 47 от 15.03.2016 г., обн., ДВ, бр. 23 от 25 Март 2016г.

Изисквания към документацията и изпитванията

№ по ред	Документ	Приложение № или текст
1.	Точно означение на типа, производителя и страната на производство (произход) и последно издание на каталога на производителя	ZLBM, ABB, България Приложение 9.3.1
2.	Техническо описание и чертежи с нанесени на тях размери	Приложение 9.3.2

№ по ред	Документ	Приложение № или текст
3.	Протоколи от типови изпитвания на английски или български език, проведени от независима изпитвателна лаборатория – заверени копия, с приложен списък на отделните изпитвания на български език	Приложение 9.3.3
4.	Сертификат/акредитация на независимата изпитвателна лаборатория, провела типовите изпитвания по т. 3 – заверено копие	Приложение 9.3.4
5.	ЕО декларация за съответствие	Приложение 9.3.5
6.	Декларация за съответствие на предлаганото изпълнение с изискванията на техническата спецификация на този стандарт за материал, вкл. на параграфи „Характеристика на материала“ и „Съответствие на предложеното изпълнение с нормативно-техническите документи“ по-горе	Приложение 9.3.6
7.	Инструкции за поддържане и експлоатация	Приложение 9.3.7

Забележка: Всички оригинални документи трябва да бъдат на български език или с превод на български език. (Каталозите и протоколите от проверките и изпитванията могат да бъдат и само на английски език.)

Технически данни:

1. Характеристики на работната среда

№ по ред	Наименование	Стойност
1.1	Място на монтиране	На закрито
1.2	Максимална температура на въздуха в околната среда	+ 40°C
1.3	Минимална температура на въздуха в околната среда	Минус 5°C
1.4	Максимална средна температура на въздуха в околната среда за период от 24 ч.	+ 35°C
1.5	Относителна влажност (при 20°C)	До 90 %
1.6	Степен на замърсяване	3
1.7	Надморска височина	До 2000 m

2. Параметри на електроразпределителната мрежата НН

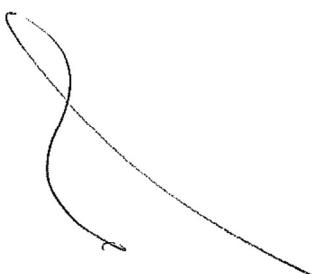

№ по ред	Наименование	Стойност
2.1	Номинално напрежение	400 / 230 V
2.2	Максимално напрежение	440 / 253 V
2.3	Номинална честота	50 Hz
2.4	Електроразпределителна мрежа	4 проводна мрежа (L ₁ , L ₂ , L ₃ , PEN)
2.5	Схема на електроразпределителната мрежа	TN-C

3. Технически параметри и други данни

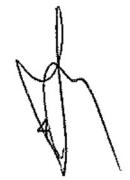

№ по ред	Технически характеристики	Изискване	Гарантирано предложение
3.1	Обявено работно напрежение, U _c	min 690 (500) V AC	690 V AC
3.2	Брой на полюсите	3	3

№ по ред	Технически характеристики	Изискване	Гарантирано предложение
3.3	Обявена честота	50 Hz	50 Hz
3.4	Категория по пренапрежение съгласно БДС EN 60664-1 или еквивалентно/и	IV	IV
3.5	Обявено издържано импулсно напрежение, U_{imp}	8 kV	8 kV
3.6	Обявено напрежение на изолацията, U_i AC	min 800 V	1000 V
3.7	Обявен работен ток, I_e	400 A	400 A
3.8	Термичен ток със стопяема вложка, I_{th}	400 A	400 A
3.9	Условен ток на късо съединение (ефективна стойност) при 400 V AC	min 50 kA	50 kA
3.10	Размер на стопяемите вложки (съгласно серията БДС EN 60269 или еквивалентно/и)	2	2
3.11	Максимален обявен ток на стопяемите вложки, I_n	400 A	400 A
3.12	Категория на приложение (при 400 V AC)	AC 22 B или по висока	AC 23 B
3.13	Механична износостойчивост, брой на комутационните цикли	min 800	800
3.14	Електрическа износостойчивост, брой на комутационните цикли	min 200	200
3.15	Управление	Триполюсно (едновременно включване и изключване на трите полюса)	ДА
3.16	Основни размери:	-	-
3.16a	широкина	max 100 mm	99 mm
3.16b	височина (измерена от края на клемните съединения)	680 mm - информативно	662 mm
3.17	Разстояние между осите на събирателните шини	185 mm	185 mm
3.18	Присъединяване към събирателните шини	Клеми за свързване без необходимост от пробиване на шините	ДА
3.19	Степен на защита срещу проникване на твърди тела и вода във вътрешността и допир до части под напрежение от лицевата страна съгласно БДС EN 60529+A1 или еквивалентно/и.	min IP20	IP20
3.20	Клемови съединения за токопроводимите жила на присъединяваните кабелни линии	Вертикалните предпазител-разединители трябва да бъдат съоръжени с V-съединителна арматура за свързване на токопроводими кабелни жила в диапазона най-малко от 35 mm ² re до 185 mm ² sm.	ДА

№ по ред	Технически характеристики	Изискване	Гарантирано предложение
3.21	Маркировка	Вертикалните предпазител-разединители трябва да бъдат маркирани с информацията съгласно т. 5.2 от БДС EN 60947-3 или еквивалентно/и и инициалите „CE”.	ДА, Вертикалните предпазител-разединители са маркирани с информацията съгласно т. 5.2 от БДС EN 60947-3 или еквивалентно/и и инициалите „CE”.
3.22	Тегло, kg	Да се посочи	4,8

Y

InLine II

Designed for the future

InLine II covers a wide range of distribution applications from single panels to industrial, residential and commercial buildings.

**Easy to install – flexible installation
and possibility to customize
the product according to needs.**

ВЯРНО С ОРИГИНАЛА

InLine II

Safety and protection

InLine II is designed to be as safe as possible. Special features cover voltage measurement, replacement of fuses and padlocking and sealing to ensure personal safety and to avoid unadmitted operation.

Easy access for voltage measurement

The front windows can be slid up to give access for voltage measurement at the fuse contacts. This enables fast and safe solution for voltage measurement with standard equipment.

Safe and efficient replacement of fuses

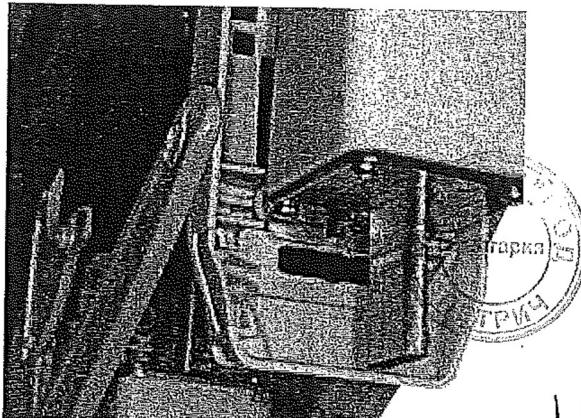

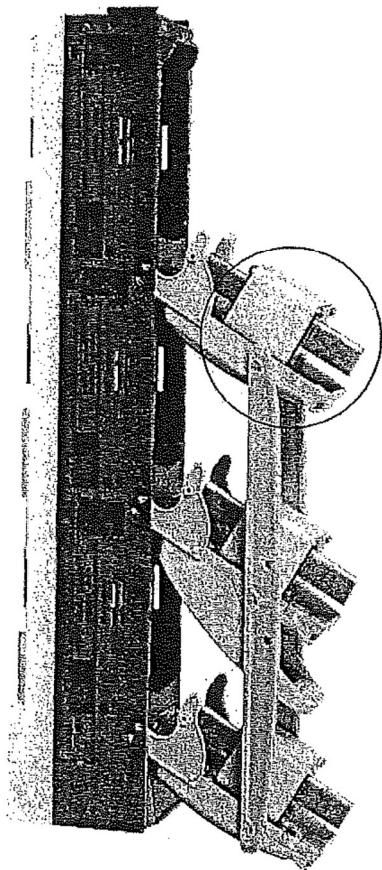

The cover has a separate 'Replacement of fuses' position. This position brings the fuses out safely from parts under live voltage to give space and safety.

Padlocking and sealing

To avoid unadmitted operation, each front cover can be padlocked with up to 2 padlocks per phase, or up to 3 padlocks per phase by using the padlock hasp. The front covers of the 1-pole variants can be placed in park position with the possibility to be padlocked.

Degree of protection IP30

InLine II fuse switch disconnectors have a degree of protection IP30 from the front.

InLine II

Easy to install with space saving features

InLine II offers a wide variety of accessories and cable terminals which guarantees flexible installation and possibility to customize the product according to needs.

Space saving

InLine II has two different body sizes which makes it adaptable according to features needed and the space available. The reduced depth of 121 mm is suitable for Cable Distribution Cabinets and the version of 154 mm enables easy integration of current transformers at the back.

Universal terminal bolts or V-clamps

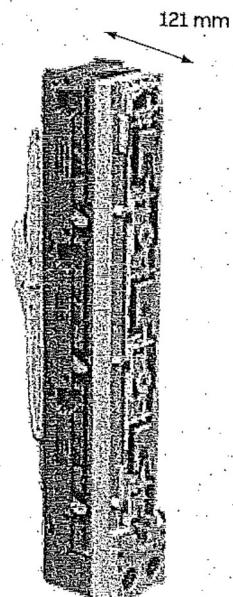

Variants with integrated V-clamps and universal terminal bolts make the connection easy for all types of cables. The ZLBM/ZHBM 123 are delivered with standing M12 bolts at the cable terminals as standard. The nut and the bolt can easily be exchanged if there is a need to insert the M12 bolt from the front. The ZLBM/ZHBM 00/123 can be delivered with integrated V-clamps.

Designed for different busbar systems

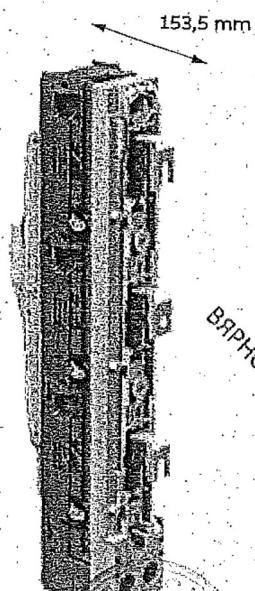

The variant 00-100 is suitable for 100 mm busbar systems.

The rest of the variants are suitable for installation at busbars with 185 mm distance.

ZLBM with reduced depth

ZHBM depth, +32,5mm

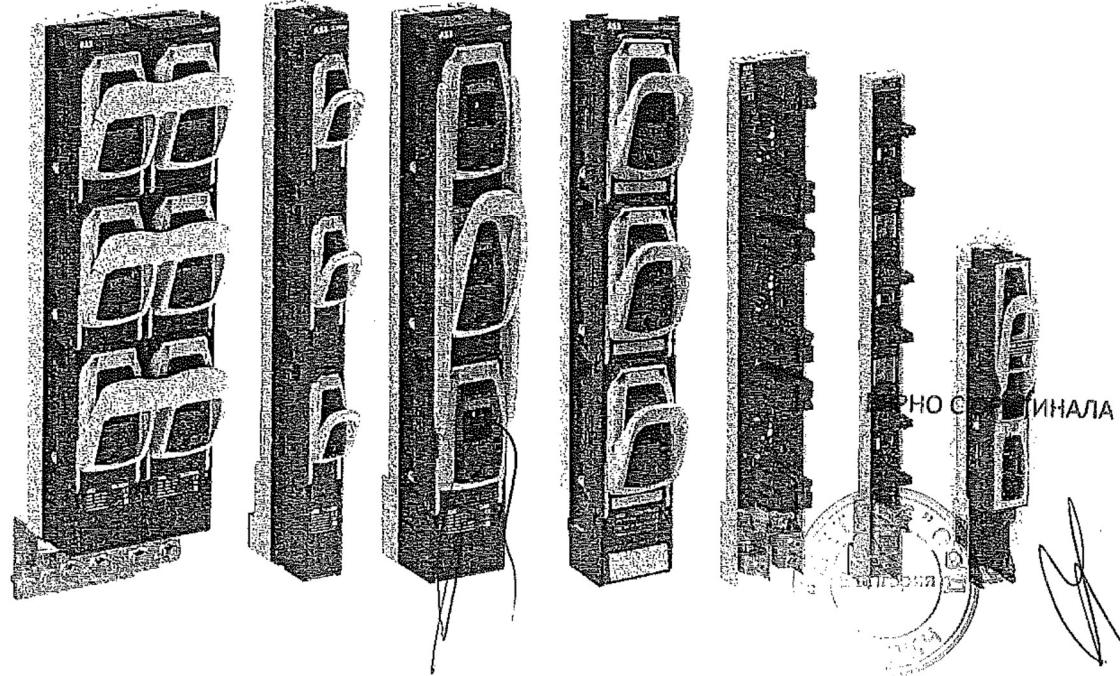

Fuse switch disconnectors and Rails

ZLBM/ZHBM/ZUBM

InLine II offers a wide variety of accessories and cable terminals which guarantees flexible installation and possibility to customize the product according to needs.

- NH00-3 / 160A-630A 1 and 3-pole switch disconnectors
- Double NH2-3 / 800-1250A 1 and 3-pole switch disconnectors

International Electrotechnical
Commission

IEC System of Conformity Assessment
Schemes for Electrotechnical
Equipment and Components (IECEE)

CERTIFICATE OF ACCEPTANCE

TO PARTICIPATE IN THE IECEE CB-SCHEME

STIEE – Shanghai Testing & Inspection Institute for Electrical Equipment

No. 505 Wu Ning Road, 200063 Shanghai, China

has been assessed and determined to fully comply with the requirements of ISO/IEC 17025: 2005-05, The Basic Rules, IECEE 01: 2012-06 and Rules of Procedure IECEE 02: 2012-06, and the relevant IECEE CB-Scheme Operational Documents

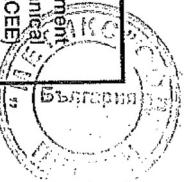

STIEE – Shanghai Testing & Inspection Institute for Electrical Equipment

is therefore entitled to operate as a Chinese CB Testing Laboratory under the responsibility of CQC as National Certification Body and to carry out testing within the IECEE CB Scheme for the Scope (Product Category(ies) and Standard(s)) as listed in the relevant part of the IECEE Web Site at www.iecee.org, and is subject to all other terms as set forth in the IECEE Basic Rules and Rules of Procedure.

This certificate remains valid until December 5th 2016 at which time it will be reissued by the IECEE Executive Secretary upon successful completion of the normally scheduled 3-year Reassessment Programme administered by the IECEE CB Scheme.

ПРИЛОЖЕНИЕ 9.3.6

Декларация за съответствие на предлаганото изпълнение с изискванията на техническата спецификация на този стандарт за материал, вкл. на параграфи "Характеристика на материала" и "Съответствие на предложеното изпълнение с нормативно-техническите документи"

Триполюсен предпазител-разединител с вертикална конструкция, с обявен работен ток 400 A, с общо управление на полюсите, за директен монтаж върху събирателни шини с междуосово разстояние 185 mm, за високомощни предпазители със стопяма вложка НН, система А (NH система), с характеристика gG, размер 2, съответстващи на стандарт БДС EN 60269-1:2007 и БДС HD 60269-2:2007.

Вертикалният предпазител-разединител за 400 A, с общо управление на полюсите отговаря на приложимите български и международни стандарти и на техните валидни изменения и поправки:

БДС EN 60947-1:2007 "Комутиационни апарати за ниско напрежение. Част 1: Общи правила (IEC 60947-1:2007)" и
БДС EN 60947-3:2002 "Комутиационни апарати за ниско напрежение. Част 3: Товарови прекъсвачи, разединители, товаров прекъсвач-разединители и апарати, комбинирани с предпазители (IEC 60947-3:1999+поправка юли 1999)"
и оценен положително по реда и при условията на Наредбата за съществените изисквания и оценяване на съответствието на електрическите съоръжения, предназначени за използване в определени граници на напрежението, приета с ПМС № 182 от 6.07.2001 г., обн., в ДВ, бр. 62 от 13.07.2001 г.

С настоящето декларираме съответствието на предлаганото изпълнение с изискванията на техническата спецификация

На основание чл.36а ал.3 от ЗОП

Инструкции за транспортиране, складиране, монтиране, поддържане и експлоатация

ВПР 400 А, триполюсно управление не трябва да се складират в среда с висока влажност, с наличие на корозивни вещества или кондензирали изпарения.

Да се съхраняват в температурния интервал -20°C +55°C.

ВПР се опаковат и транспортират в картонени кутии, да се избягва изпускането на кутиите по време на транспортирането и товаро-разтоварните работи

Настоящото приложение се прилага във връзка с участието ми в:

търг с предмет:

"Доставка и монтаж на комплектни метални трансформаторни постове"

РЕФ. № PPD 19-102

организиран от "ЧЕЗ Разпределение България" АД

Наименование на материала: Вертикален разединител НН 1000 А, с триполюсно управление

Съкратено наименование на материала: ВР НН, 1000 А, 3-полюсно управление

Област: Н – Трансформаторни постове

Категория: 16 - Предпазители, основи за предпазители и предпазител-разединители

Мерна единица: Брой

Аварийни запаси: Да

Характеристика на материала:

Триполюсен разединител с вертикална конструкция, с обявен работен ток 1000 А, с общо управление на полюсите, за директен монтаж върху събирателни шини с междуосово разстояние 185 mm, съоръжен с твърди връзки (тоководещи шини), система А (NH система), размер 3, съответстващи на БДС EN 60269-1 и БДС HD 60269-2 или еквивалентно/и.

Използване:

Вертикалният предпазител-разединител е предназначен за свързване на шинните системи на разпределителните табла посредством едножилни кабели НН.

Съответствие на предлаганото изпълнение с нормативно-техническите документи:

Триполюсният вертикален разединител за 1000 А, с общо управление на полюсите трябва да отговаря най-малко на посочените по-долу стандарти или еквиваленти и на техните валидни изменения и допълнения:

- БДС EN 60947-1:2007 „Комутиационни апарати за ниско напрежение. Част 1: Общи правила (IEC 60947-1:2007)“ или еквивалентно/и;
- БДС EN 60947-3:2009 „Комутиационни апарати за ниско напрежение. Част 3: Товарови прекъсвачи, разединители, товарови прекъсвач-разединители и апарати комбинирани със стопяеми предпазители (IEC 60947-3:2008)“ или еквивалентно/и;
- БДС EN 60269-1:2007 „Стопяеми предпазители за ниско напрежение. Част 1: Общи изисквания (IEC 60269-1:2006)“ или еквивалентно/и;
- БДС HD 60269-2:2013 „Стопяеми предпазители за ниско напрежение. Част 2: Допълнителни изисквания за стопяеми предпазители, предназначени за използване от квалифицирани лица (стопяеми предпазители предимно за промишлено приложение). Примери за стандартизиирани системи за стопяеми предпазители от А до К (IEC 60269-2:2013, с промени)“ или еквивалентно/и;
- БДС EN 60664-1:2007 „Координация на изолацията за съоръжения в електроразпределителни мрежи за ниско напрежение. Част 1: Правила, изисквания и изпитвания (IEC 60664-1:2007)“ или еквивалентно/и;
- БДС EN 60529+A1:2004 „Степени на защита, осигурени от обвивката (IP код) (IEC 60529:1989 + A1:1999) или еквивалентно/и“

И да бъде оценен положително по реда и при условията на Наредбата за съществените изисквания и оценяване на съответствието на електрически съоръжения, предназначени за използване в определени граници на напрежението, приета с ПМС № 47 от 15.03.2016 г., обн., ДВ, бр. 23 от 25 Март 2016г.

Изисквания към документацията и изпитванията

№ по ред	Документ	Приложение № или текст
1.	Точно означение на типа, производителя и страната на производство (произход) и последно издание на каталога на производителя	SLT3-3SR/3X3/1000 Jean Muller, Германия, Приложение 9.4.1
2.	Техническо описание и чертежи с нанесени на тях размери	Приложение 9.4.2
3.	Протоколи от типови изпитвания на английски или български език, проведени от независима изпитвателна лаборатория – заверени копия, с приложен списък на отделните изпитвания на български език	Приложение 9.4.3
4.	Сертификат/акредитация на независимата изпитвателна лаборатория, провела типовите изпитвания по т. 3 – заверено копие	Приложение 9.4.4
5.	ЕО декларация за съответствие	Приложение 9.4.5

№ по ред	Документ	Приложение № или текст
6.	Декларация за съответствие на предлаганото изпълнение с изискванията на техническата спецификация на този стандарт за материал, вкл. на параграфи „Характеристика на материала“ и „Съответствие на предложеното изпълнение с нормативно-техническите документи“ по-горе	Приложение 9.4.6

Забележка: Всички оригинални документи трябва да бъдат на български език или с превод на български език. (Каталозите и протоколите от проверките и изпитванията могат да бъдат и само на английски език.)

Технически данни:

1. Характеристики на работната среда

№ по ред	Наименование	Стойност
1.1	Място на монтиране	На закрито
1.2	Максимална температура на въздуха в околната среда	+ 40°C
1.3	Минимална температура на въздуха в околната среда	Минус 5°C
1.4	Максимална средна температура на въздуха в околната среда за период от 24 ч.	+ 35°C
1.5	Относителна влажност (при 20°C)	До 90 %
1.6	Степен на замърсяване	3
1.7	Надморска височина	До 2000 m

2. Параметри на електроразпределителната мрежата НН

№ по ред	Наименование	Стойност
2.1	Номинално напрежение	400 / 230 V
2.2	Максимално напрежение	440 / 253 V
2.3	Номинална честота	50 Hz
2.4	Електроразпределителна мрежа	4 проводна мрежа (L ₁ , L ₂ , L ₃ , PEN)
2.5	Схема на електроразпределителната мрежа	TN-C

3. Технически параметри и други данни

№ по ред	Технически характеристики	Изискване	Гарантирано предложение
3.1	Обявено работно напрежение, U _e	690 (500) V AC	690 V AC
3.2	Брой на полюсите	3	3
3.3	Обявена честота	50 Hz	50 Hz
3.4	Категория по пренапрежение съгласно БДС EN 60664-1 или еквивалентно/и	IV	IV
3.5	Обявено издържано импулсно напрежение, U _{imp}	8 kV	12 kV
3.6	Обявено напрежение на изолацията, U _i AC	min 800 V	1000 V AC
3.7	Обявен работен ток, I _e	1000 A	1000 A
3.8	Термичен ток със стопяма вложка, I _{th}	1000 A	1000 A
3.9	Условен ток на късо съединение (ефективна стойност) при 400 V AC	min 50 kA	120 kA

№ по ред	Технически характеристики	Изискване	Гарантирано предложение
3.10	Размер на твърдите връзки/тоководещи шини (съгласно серията БДС EN 60269 или еквивалентно/и)	3	3
3.11	Максимален обявен ток на стопляемите вложки, I_{th}	1000 A	1000 A
3.12	Категория на приложение (при 400 V AC)	AC 20 B или по-висока	AC 22 B
3.13	Механична износостойчивост, брой на комутационните цикли	min 500	800
3.14	Електрическа износостойчивост, брой на комутационните цикли	min 100	100
3.15	Управление	Триполюсно (едновременно включване и изключване на трите полюса)	Триполюсно (едновременно включване и изключване на трите полюса)
3.16	Основни размери:	-	-
3.16a	широкина	max 100 mm	99 mm
3.16b	височина (измерена от края на клемните съединения)	680 mm - информативно	662 mm
3.17	Разстояние между осите на събирателните шини	185 mm	185 mm
3.18	Присъединяване към събирателните шини	Клеми за свързване без необходимост от пробиване на шините	Клеми за свързване без необходимост от пробиване на шините
3.19	Степен на защита срещу проникване на твърди тела и вода във вътрешността и допир до части под напрежение от лицевата страна съгласно БДС EN 60529+A1или еквивалентно.	min IP20	IP30
3.20	Клемови съединения за токопроводимите жила на присъединяваните кабелни линии	Вертикалните разединители трябва да бъдат съоръжени с V-съединителна арматура за свързване на токопроводими кабелни жила в диапазона най-малко от 185 mm ² ре до 240 mm ² sm.	Присъединяването не се осъществява чрез V-съединителна арматура. Макс. сечение на присъединяваните кабели до 2x300 (3x120) mm ²
3.21	Маркировка	Вертикалните разединители трябва да бъде маркирани с информациите съгласно т. 5.2 от БДС EN 60947-3 или еквивалентно и инициалите „CE”.	Вертикалните разединители са маркирани с информациите съгласно т. 5.2 от БДС EN 60947-3 или еквивалентно и инициалите „CE”.
3.22	Тегло, kg	Да се посочи	8,5 kg

ПРИЛОЖЕНИЕ 9.4.1

Точно означение на типа, производителя и страната на производство
(Произход) и последно издание на каталога на производителя

Настоящото приложение се прилага във връзка с участието ми в:

търг с предмет:

“Доставка и монтаж на комплектни метални трансформаторни постове”

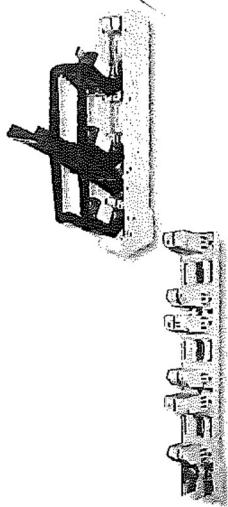

РЕФ. № PPD 19-102

организиран от “ЧЕЗ Разпределение България” АД

NH-Sicherungslastschaltleisten

NH strip-type fuse-switch-disconnectors

NH-Sicherungslastschaltleisten Größe 1-3 für
185mm Sammelschienensysteme
NH strip-type fuse-switch-disconnectors
size 1 to 3 for 185mm busbar systems

Vorteile, die überzeugen

Schalthebel

- Langer Schalthebel für sicheres und schnelles Schalten
- Abschließbar mit bis zu 3 Vorhangeschlössern in EIN- und AUS-Stellung

Montage

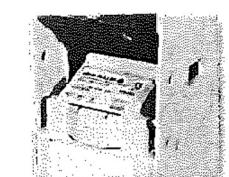

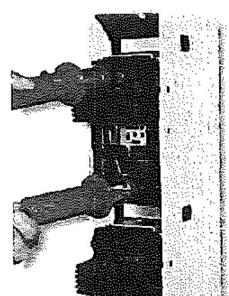

- Sichere Montage unter Spannung durch stets berührungs geschütztes Kontakt system
- Nachrüstbare Montagehaken

Messung und Überwachung

- Sichere Spannungsmessung durch Prüflöcher über den Sicherungsaufnahmekontakten
- Elektronische Sicherungsüberwachung oder Sicherungsüberwachung durch Motorschutzschalter
- Einsatz von Wandlersicherungen für temporäre Strommessungen

Anschlussraumabdeckung

- Anschlussraumabdeckung im Gerät integriert
- Typenschild auch im eingebauten Zustand jederzeit lesbar

Convincing advantages

Operating lever

- Long operating lever for safe and reliable switching
- Lockable with up to 3 padlocks in both ON and OFF position

Installation

- Safe installation on live busbars due to always touch proof contacts
- Retrofittable mounting hooks

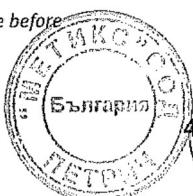

Measuring and monitoring

- Safe voltage testing through test holes leading to blade-contacts
- Electronic fuse monitoring or fuse-monitoring by means of motor circuit-breaker
- Current-transformer (c.t.) fuse-links for temporary current measurements

ВЯРНО С ОРИГИНАЛА

Terminal cover

- Integrated in NH strip-type fuse-switch-disconnector
- Markings always readable before and after installation

ВЯРНО С ОРИГИНАЛА

NH-Sicherungsleisten

NH strip-type fuse-switch-disconnectors

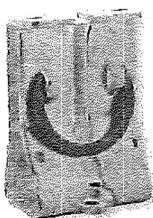

NH-Sicherungsleisten Größe 1-3
DELTA und OMEGA Kontaktssystem
*NH strip-fuseways size 1-3
DELTA and OMEGA contact system*

Vorteile, die überzeugen

OMEGA Kontaktssystem

- Maximale Sicherheit dank hohem Kurzschlusseinschaltvermögen (120kA/500V)
- Gefahrloser Betrieb durch hohe Schaltleistung bis zu AC-23B (400V/400A)
- Korrosionsfreie Edelstahl-Fremdfederung
- Robustes und alterungsbeständiges Kontaktssystem mit hohen Rückstelleigenschaften

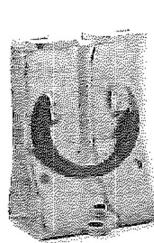

DELTA Kontaktssystem

- Gezielte Lichtbogenführung und geringer Kontaktverschleiß durch Opferelektroden
- Gefahrloser Betrieb durch hohe Schaltleistung bis zu AC-23B (400V/630A)
- Hohe Alterungsbeständigkeit durch zwei voneinander unabhängige Fremdfederamente
- Optimale Kontaktierung und niedrige Verlustleistung durch 2fach-Linikontaktestsyste
- Hohe Kurzschlussfestigkeit bis zu 120kA durch integrierte Kurzschlussblockade

Einsatz

- Das OMEGA Kontaktssystem bietet für die typischen Anwendungen im Bereich der Versorgungsnetzbetreiber für Geräte der Größe 1 und 2 ein ideal angepasstes Leistungsprofil
- Das DELTA Kontaktssystem sorgt mit seiner Stromtragfähigkeit von bis zu 1000A Dauerstrom insbesondere in industriellen Anwendungen sowie in Geräten mit einem Be-messungsstrom von > 400A für hervorragende Lastschalteigenschaften

Convincing advantages

OMEGA contact system

- Maximum safety thanks to high short-circuit making capacity (120kA/500V)
- Riskless operation due to high switching capacity up to AC-23B (400V/400A)
- Corrosion-resistant external spring elements made by stainless steel
- Robust and age-resistant contact system with high restoring properties

DELTA contact system

- Defined arc initiation and low contact wear due to sacrificial electrodes
- Riskless operation due to high switching capacity up to AC-23B (400V/630A)
- High age resistance by two independent spring elements
- Optimal contacting and low power loss by dual line contact system
- High short-circuit strength up to 120kA by integrated short circuit pinch-stop

Application

- The OMEGA contact system offers an optimum performance profile for size 1 and 2 devices to be installed in power utility networks
- The DELTA contact system, having current carrying capability up to 1000A, provides excellent load-break capability in industrial applications and in switching devices having rated currents above 400A.

NH-Sicherungslastschaltleisten

NH strip-type fuse-switch-disconnectors

NH-Sicherungslastschaltleiste SL3/910A und SL3/910Aplus NH strip-type fuse-switch-disconnector SL3/910A and SL3/910Aplus

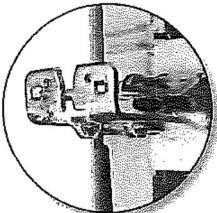

Vorteile, die überzeugen

Großzügige Dimensionierung

- Geringe Verlustleistung dank 480mm² Querschnitt bei Einspeisewinkeln und Abgangsschienen
- Niedrige Kontakttemperaturen durch gute Wärmeabführung

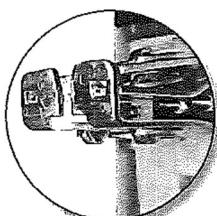

Gute Anschlussbedingungen

- Spezielle Anschlusselemente ermöglichen 2-Leiteranschluss bis 2x300mm² oder 3-Leiteranschluss bis 3x185mm²
- Einfache Montage auf Sammelschienensystem durch 100mm Baubreite

SL3/910A

- Standardgerät für übliche Anwendungen der Versorgungsnetzbetreiber
- DELTA Kontaktsystem für hohe Schaltleistung

SL3/910Aplus

- Kontaktsystem DELTAplus für erschwerte Einsatzbedingungen
- Sechs unabhängig befederte Linienkontakte pro Sicherungsaufnahmekontakt für beste Kontaktierung

Convincing advantages

Generously dimensioned

- Low power loss thanks to 480mm² cross section of feeding contacts and terminal bars
- Low contact temperature-rise due to excellent heat dissipation

Fast and easy connecting

- Special connectors enable the connection of two conductors up to 2x300mm² or three conductors up to 3x185mm² cross section
- Easy installation on busbars due to uniform 100mm width

SL3/910A

- Standard Product for regular power utility applications
- DELTA contacts for superior breaking capacity

SL3/910Aplus

- DELTAplus contacts for severe operating conditions
- Six independent spring loaded linear contacts corresponding to each blade contact provide optimum contact performance

Größe 3/910A > 185mm Sammelschienensystem > Sekundärschutz von 630kVA-Transformatoren > DELTA Kontaktssystem
Size 3/910A > 185mm busbar system > Secondary protection of 630kVA transformers > DELTA contact system

NH-Sicherungslastschaltleisten

NH strip-type fuse-switch-disconnectors

NH-Sicherungslastschaltleisten Größe 4a

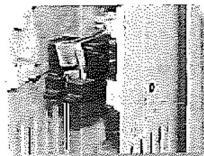

NH strip-type fuse-switch-disconnectors size 4a

Vorteile, die überzeugen

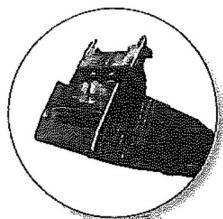

Kompatibilität

- Reduzierte Einbauhöhe bei 248mm Baubreite
- VerschiedeneB erührschutzabdeckungen als Zubehör
- Nachrüstbar mit Mikroschaltern zur Sicherungsüberwachung (Schlagmelder-ausführung)
- Schaltstellungsanzeige nachrüstbar

LYRA-Kontaktsystem

- LYRA-Kontaktsystem mit Q-Einschalthhilfe für hohes Schaltvermögen
- 4 unabhängig befederte Kontaktschenkel für niedrige Verlustleistung

Hohe Sicherheit

- Sichere Deckelverriegelung für hohe Kurzschlussfestigkeit bis 80kA

Convincing advantages

Compatibility

- Reduced installation height at 248mm width
- Various protective covers available
- Retrofit microswitch for fuse monitoring (striker fuse-links)
- Retrofit switch position monitoring

LYRA contact system

- LYRA contact system with Q-making feature
- Four independently spring loaded contact fingers ensure low power loss

High safety level

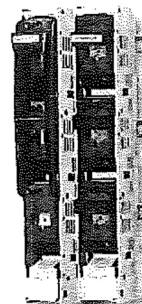

- Reliable fusé carrier latch for high short-circuit current withstand up to 80kA

Kompetenz Competence

Sonderbauformen/Special versions

Die unterschiedlichen Anwendungsfälle unserer Kunden erfordern besondere Lösungen. Diese zu entwickeln, ist eine Herausforderung, der sich JEAN MÜLLER seit mehr als 115 Jahren erfolgreich stellt. Die Anpassung der Bauformen oder die Ergänzung mit Spezialteilen generiert Kundennutzen. In enger Abstimmung mit unseren Partnern werden solche individuellen technischen Lösungen für besondere Einbausituationen und Anforderungen geschaffen.

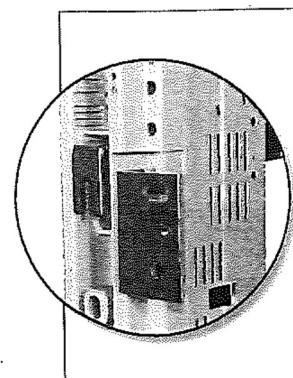

The different applications of our customers require special solutions. JEAN MÜLLER has successfully met the challenge of the development of those extraordinary solutions for more than 115 years. The adaptation of product-versions and the completion with special accessories generates customer's benefit. Individual technical solutions for special built-in applications and requirements are designed in close coordination with our partners.

Sie haben keine Lösung für Ihre Anwendung gefunden?/You haven't found any solution for your application?

Eine zusätzliche Verriegelung sorgt bei Trennschaltleisten für eine Bemessungskurzzeitstromfestigkeit von 25kA/1s und ermöglicht damit einen Einsatz als Trennschalter auf der Sekundärseite von 630kVA-Transformatoren ($I_k = 22,75\text{kA}$ bei $u_k = 4\%$)

An additional interlock at switch-disconnectors makes sure a rated short-time withstand current of 25kA/1s and enables therewith an usage as switch-disconnector on the secondary side of 630kVA-transformers ($I_k = 22,75\text{kA}$ at $u_k = 4\%$)

Geschlitzte Einspeisewinkel ermöglichen das Einhängen des Schaltgerätes auf die vormontierten Befestigungsbolzen am Sammelschienensystem

Slotted feeding contacts allow to hook the disconnector into pre-assembled bolts on busbar system

ТЕХНИЧЕСКО ОПИСАНИЕ
на
Вертикален разединител НН 1000А с триполюсно управление

I. Описание

Триполюсните разединители серия SLT-3S са произведени от фирма Jean Muller и са предназначени за включване, изключване, разединяване на шинни системи. Те комбинират три еднополюсни разединителя в един корпус. SLT-3S са с вертикална конструкция с общо управление на полюсите и могат да бъдат включвани и изключвани под товар. Те са за директен монтаж върху събирателни шини с междуосово разстояние 185 mm.

Корпусът на SLT-3S е изработен от високоякостна стъклонапълнена пластмаса. Контактната система със сребърно покритие осигурява малки загуби, оптимални термични характеристики и висока комутационна способност. Тоководещите части остават недостъпни и след премахване на горната част, благодарение на защитните капаци с вградени дъгогасителни камери оставащи в основата.

СПИСЪК

на типовите изпитвания, проведени от независима изпитвателна лаборатория,
за предлаганите вертикални разединители, както следва:

Марка: Jean Muller
Продукт: вертикален предпазител-разединители
Серия: SL3

- 5.2 Маркировка
7.1 Конструкция
8.3.3 Основни характеристики
8.3.3.1 Повишаване на температурата
8.3.3.2 Диелектрични свойства
8.3.3.3 Работна и гранична изключвателна възможност при късо съединение
8.3.3.4 Проверка на диелектричните свойства
8.3.3.5 Ток на утечка
8.3.3.6 Проверка при повишаване на температурата
8.3.3.7 Експлоатационна възможност на задвижващия механизъм
8.3.4 Работни характеристики
8.3.4.1 Изпитване на експлоатационната възможност
8.3.4.2 Проверка на диелектричните свойства на прекъсвач-разединителя
8.3.4.3 Ток на утечка
8.3.4.4 Проверка при повишаване на температурата
8.3.5 Характеристики при късо съединение
8.3.5.1 Издържан импулсен ток
8.3.5.2 Работна изключвателна възможност при късо съединение
8.3.5.3 Проверка на диелектричните свойства
8.3.5.4 Ток на утечка
8.3.5.5 Проверка при повишаване на температурата
8.3.6 Условен ток на късо съединение
8.3.6.2 Издържан ток на късо съединение със стопял предпазител
8.3.6.3 Проверка на диелектричните свойства
8.3.6.4 Ток на утечка
8.3.6.5 Проверка при повишаване на температурата
8.3.7 Характеристики при претоварване

NOTIFICATION OF TEST RESULTS

Product

fuse-switch-disconnectors

Tested by request of

Jean Müller GmbH, Friedrichstrasse 21,D-65343 Eltville am Rhein, Germany

Manufactured at (name and place)

Jean Müller GmbH, Friedrichstrasse 21,D-65343 Eltville am Rhein, Germany

Rating and principal characteristics

Ui 1000V, Ith 722 A/1000 A

Pre-licence factory inspection carried out by

VDE

Trade mark (if any)

JEAN MÜLLER

Model/Type Ref.

SL 3-3x/1000 and SL 3-3x3/1000

Additional information (if any)

A sample of product has been tested and found to be in conformity with the current HD/EN and equivalent national standard, (number and edition) EN 60947-3:1999

as shown in the Test Report (ref.No.) 2001980.54 (36 pages)

This Notification of Test Results is the result of testing a sample of the product submitted, in accordance with the provisions of the relevant specific standard.

This Notification of Test Results has been established by a body which participates in the CENELEC Certification Agreement (CCA) of 11th September 1973 as amended on 29th March 1983. Any other body participating in the CCA will take this Notification as a basis for granting a national mark of conformity or a national approval as specified in the CCA, as long as the standard referred to above is still in force in the country of that body.

ЗАРНО С ОРИГИНАЛА

Model and/or type reference : SL 3-3x/1000 and SL 3-3x3/1000

Manufacturer : Jean Müller GmbH, Eltville am Rhein, Germany

Rating(s)..... : *Ui 1000 V, Ith 722 A / 1000 A*

Particulars: test item vs. test requirements

- method of operation..... : *dependent manual operation*
 - switching positions : *2 (on and off)*
 - number of poles : *3-poles*
 - kind of current : *AC*
 - number of phases : *3*
 - rated frequency (Hz) : *50 Hz*
 - number of positions of the main contacts : *2 (on and off)*
- Rated and limiting values, main circuit**
- rated operational voltage Ue (V) : *400 V, 500 V and 690 V*
 - rated insulation voltage Ui (V) : *1000 V*
 - rated impulse withstand voltage Uimp (kV) : *12 kV*
 - conventional free air thermal current Ith (A)..... : *fuse: 722 A*
disconnect knife: 1000 A

- conventional enclosed thermal current Ithe (A)..... :

- rated operational current Ie (A) : *fuse: 722 A*
disconnect knife: 1000 A

- rated uninterrupted current Iu (A) : *fuse: 722 A*
disconnect knife: 1000 A

- utilization category..... : *with disconnect knife:*
AC-21B 630 A 690 V
AC-22B 1000 A 400 V
AC-22B 800 A 500 V

with fuse:

- AC-21B 630 A 690 V*
- AC-22B 722 A 400 V*
- AC-22B 630 A 500 V*

Short-circuit characteristic

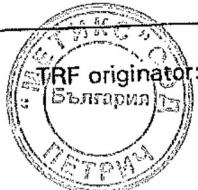

- rated short-time withstand current Icw (kA)
- rated short-time making capacity Icm (kA)
- rated conditional short-circuit current..... : *50 kA at 400 V*

Rated and limiting values, auxiliary circuits : *N*

- rated operational voltage (V)
- rated frequency (Hz)

General remarks

This test report shall not be reproduced except in full without the written approval of the testing laboratory.

The test results presented in this report relate only to the item tested.

"(see remark #)" refers to a remark appended to the report.

"(see appended table)" refers to a table appended to the report.

Throughout this report a comma is used as the decimal separator.

The making and breaking tests and short-circuit tests were carried out with a metallic screen placed at 165 mm at the top and 150 mm from the side of the fuse-switch-disconnector, with the cable terminals at the top.

The fuse-switch-disconnector type SL 3-3x/1000 were tested as follows:

Test sequence I and II: tests were done on phase L2, the load circuit was connected to phase L2, phases L1 and L3 were connected to the supply.

Test sequence IV: tests were done with a 3-phase supply, in the 'O-test' the load circuit was connected to all phases, in the 'CO-test' the load circuit was connected to L1 and L2.
